Better make an emergency landing, Tails...
...Cuz it looks like she could use some help!

Your chances of beating me just went from slim to none, Eggman!

Ha! Ha! Ha! See if you can make it through here, Sonic!
It's another decoy piloting a mecha. Adorable.
This is all part of a bigger plan! he's trying to distract us from the Starfall Islands!
You guys invited me to go there and help find the Chaos Emeralds, right?
Right! They're a mysterious set of islands. Legend has it a long-lost civilization once lived there. For some reason the Chaos Emeralds started gathering there.
And now Eggman launches a decoy to keep us busy. he's definitely up to something!
Mystery! Action! Adventure! Sound like fun to you?
You know it does! Let's go!

Um, hello boss. Enjoying your island excursion?
This is a business trip, not a vacation!
Of course, sir, and I hate to interrupt, but...
Just spit it out already!
Sonic and his friends just trashed Unit D3-C04.
What?!
And you're telling me now?!
There were... Er... Technical difficulties trying to reach you.

Grr... Just keep things running until I return.
I take the time to program life-like personalities into some minions, and all it does is frustrate me. Once-- just once!-- I'd like one of my creations to fill me with pride instead of regret!
The relics hidden on the Starfall Islands are staggeringly advanced.
Maybe once I take them for my own, I can finally craft the ultimate creation...
First things first! The rodent is undoubtedly on his way here. I'll have to accelerate my plans.
Warning. A.I. integration untested. System stress test untested. Accelerated timetable is not advised.
Ah, but I developed you to protect me, and my coding is impeccable!
There's no time to waste with Sonic on the way. Hurry up and download yourself for deployment!
Download complete.
Very good!
My latest, greatest artificial intelligence will make short work of the Ancients' cyber security!
And then all of their fantastic achievements will be mine to control!
To Be Continued in Sonic Frontiers!
